

# FINN ROTOR

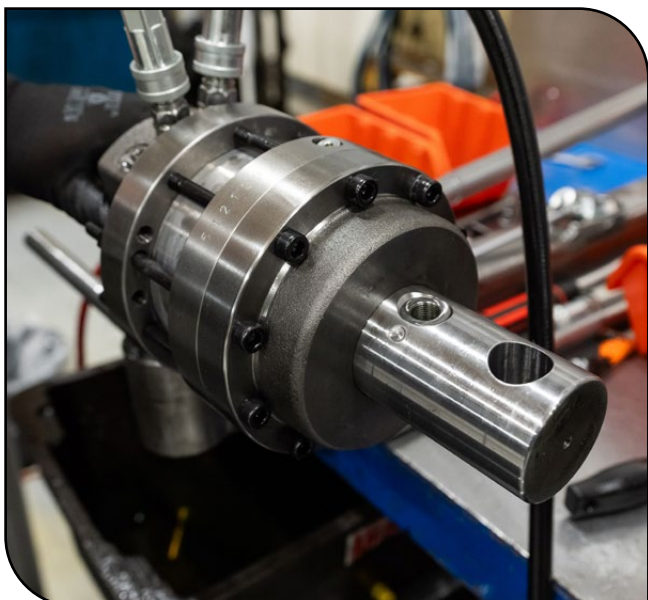

**Power you can trust**

## HIGH-QUALITY ROTATORS AND VALVES

Finn-Rotor manufactures hydraulic rotators and control valves for forestry and general cargo cranes. Over decades, our originally Finnish company has grown into a significant global operator with a sales network covering more than 40 countries.

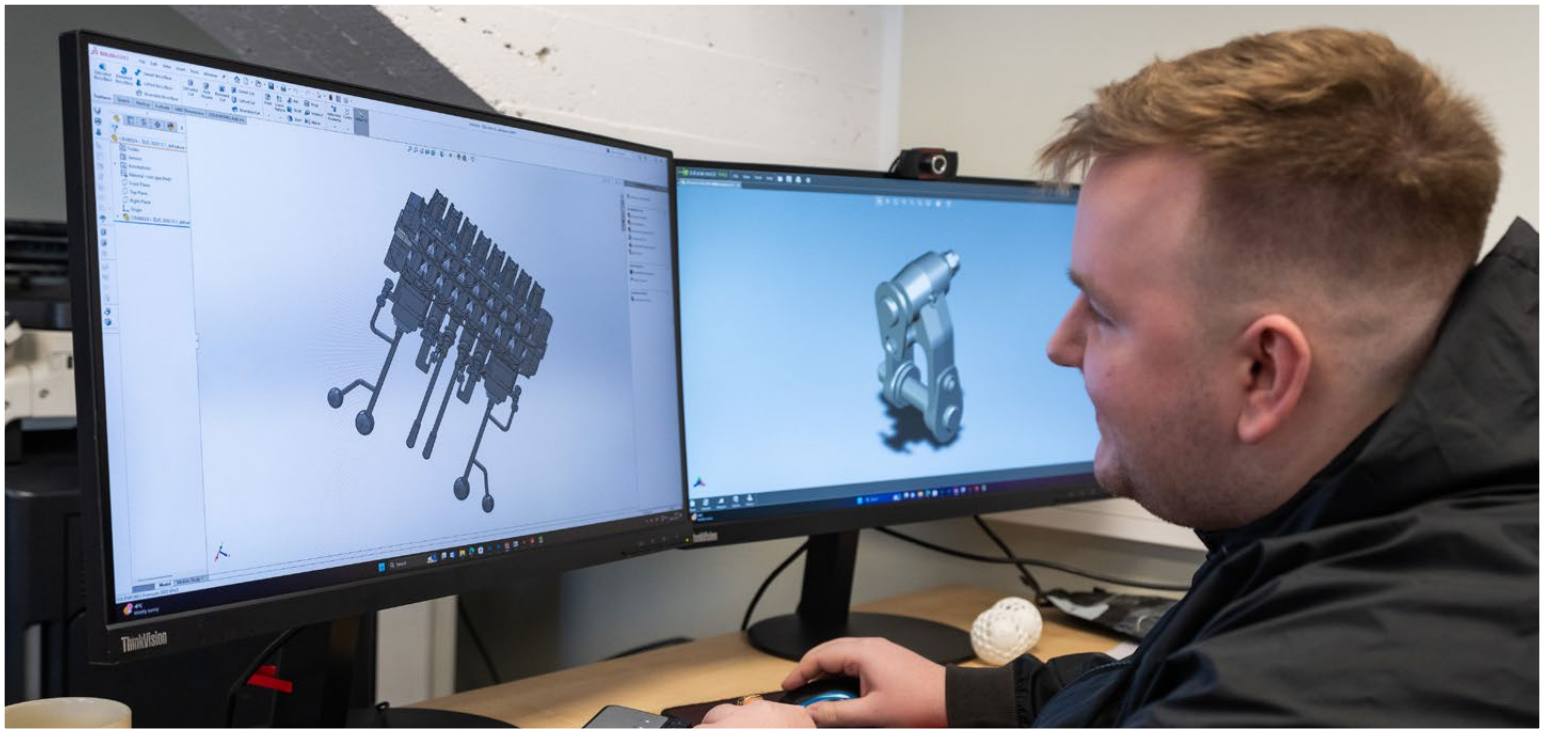

Our production facilities are located in Pärnu, Estonia, where we design and manufacture products for our own Finn-Rotor brand and private label products for our customers.

## DECADES OF EXPERIENCE

Finn-Rotor Oy was founded in Saarijärvi, Central Finland, in 1982. Actual operations started during the following years, initially focusing on the manufacture of infinitely rotating turning devices. The design and manufacture of hydraulic control valves began in the late 1990s.

Over the decades, our operations and product range have expanded, but the operating principle has remained constantly the same: we want to offer our customers high-quality competitive products to make their work easier.

## PRODUCT DEVELOPMENT GUARANTEES QUALITY

We make our products to serve our customers. Therefore, we invest in the continuous development of our products, processes and manufacturing methods. This way, we can always offer our customers high-quality products that match their needs.

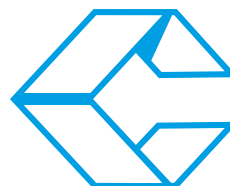

Taking the environment into account has played an important role in our operations from day one. Our operations have been ISO-certified since the 1990s.

## TRACEABILITY FROM BEGINNING TO END

With modern processes and software, we can track the journey of individual products from manufacturing to customer use. Our customers benefit when we can provide them with transparent customer service and detailed information in every phase of the process.

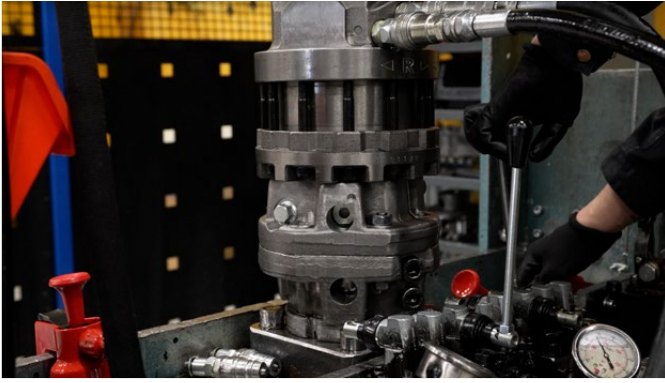

PACKAGING FROM IDEA TO REALIZATION

**CISTA**  
Pakendivabrik

• Cardboard packaging • Corrugated cardboard packaging  
• Archival articles • Fast food packaging

## ROTATORS

Our rotators are designed to offer infinite rotation and top-class performance. Our extensive model range includes rotators for a wide range of machine types. By choosing our rotators, you will get reliability and endurance for all of your lifting operations.

### Product series

- CRA:** Shaft rotators for vehicles and agricultural and cargo cranes
- CRF:** Flange rotators for cargo and forest cranes
- CRH:** Double bearing rotators for heavy-duty cranes
- CRM:** Rotators for forestry needs
- CRS:** Special models with four oil channels
- CRFF:** Flat head rotators

### Accessories

With our accessories, you can ensure the functioning and efficiency of your equipment.

**LINKS:** Our extensive range of links makes it easy to find the option that matches your needs. Links both with and without brakes are available.

**HOOKS:** With the RH lifting hook, you can connect a lifting device to the rotator. The high-quality hooks withstand harsh use.

LOGISTICS  
AS A SERVICE

**BETTER LOGISTICS** – that's what we do!  
Trusted partner for Finn-Rotor.

## VALVES

We manufacture high-quality valves for machines used in agriculture and forestry, among others. Our commitment to high quality and continuous product development ensures that our customers get durable and efficient valves that match the requirements of modern machinery.

### Product series

- CRV 104** hydraulic joystick
- CRV 60** control valves
- CRV 80S** multiblock valves

From single component to the complete system!
